## Objectives

To further current skillsets as well as learning more skills which can then be used in further projects. Learning from others in a collaborative studio setting is the best way to deepen my knowledge.

Opportunities to try out different techniques and to experiment with the form in exciting ways is always a rewarding experience, as well as taking the opportunity to implement storytelling into every aspect of a project.

## Experience

### Senior Thesis: *Pink Lady & The Lemonheads*

- Fabricated two puppets using original plaster molds. Experimented with paper cut out animation mixed in with digital 2D animation and hand-drawn backgrounds to create a unique visual look.
